Carillon Eagle Mid Cap Growth Fund
Seeking growth at a reasonable price
DON’T MISS OUT ON MID CAPS

The Russell Midcap® Index consists of companies with market caps between roughly $2 billion and $35 billion. Mid-caps include companies in a range of industries from medical device manufacturers to restaurant chains. Investors with allocations to large, small/mid-cap (SMID) or small-cap equities may own some stocks in the Russell Midcap Index, but may be missing out on the full potential of mid-cap stocks.

GROWTH POTENTIAL

Mid-cap companies can combine some of the best attributes of larger and smaller companies. The ability to help limit risk in down markets is generally associated with large-cap stocks, while the potential to perform competitively in up markets is generally associated with small-caps. The mid-cap space has demonstrated the potential to do a bit of both. (See Chart 1)

RISK/RETURN CHARACTERISTICS

Investors may be missing mid-cap stocks’ potential to add absolute returns and portfolio diversity. Investors must also consider risk-adjusted returns. Mid-caps can offer an attractive return relative to their risk. It may not be necessary to take the risks associated with small-caps to see similar returns. (See Chart 2)

OVERLOOKED OPPORTUNITY

While mid-cap stocks represent 27 percent of the overall market,¹ they account for only about 11 percent of assets in U.S. domestic mutual funds. Only $799 billion of the roughly $7.3 trillion in total assets invested in U.S. open-ended equity mutual funds were in the mid-cap space.² (See Chart 3)

Investors may believe they are adequately invested in mid-caps if they have exposure to stocks in the Russell 1000® Index. However, the 200 or so top large-cap stocks in the Russell 1000® Index can eclipse the mid-cap holdings in their weightings. Investors seeking mid-cap exposure should not rely on combined allocations across market capitalizations to provide it. Investing with a dedicated active mid-cap manager can be an effective way to gain exposure to these stocks’ potential benefits.

AIM FOR LONG-TERM GROWTH

The Carillon Eagle Mid Cap Growth Fund team seeks companies where the future looks brighter than the past to help meet investors’ growth goals. Our managers look for solid, diverse companies with accelerated earnings growth that is expected to continue over the longer term. We find that mid-cap companies can offer distinctive potential for growth in a portfolio. As seen below in Chart 4, the Carillon Eagle Mid Cap Growth Fund has consistently outperformed its benchmark since 2006.

FOCUS ON FUNDAMENTALS AND RISK MANAGEMENT

Our team seeks companies with strong fundamentals that are supported by unique products or positioning within their respective industries - what's known as "secular growth." The Fund’s managers go to great lengths to uncover information about the companies they select. Both qualitative factors – understanding a company’s competition – and quantitative factors – high earnings growth – are considered.

Before investing in companies for the portfolio, management and/or research analysts:

- Look for companies with a positive catalyst for growth
- Meet the company's management and assess its fundamentals
- Focus on stocks with a market capitalization within the bounds of the Russell Midcap® Growth Index

TOTAL ASSETS: $6.07 billion
Primary benchmark: Russell Midcap® Growth Index

Class A Shares (HAGAX)
Class I Shares (HAGIX)

(Overall, 3-, and 10-year)
(Overall, 5-, and 10-year)

Inception date: 8/20/1998
Inception date: 6/21/2006

As of June 30, 2020, Carillon Eagle Mid Cap Growth Fund A shares was rated against the following number of funds in the Mid-Cap Growth category over the following time periods: 558 funds for the overall and three year time period, and 381 funds in the last ten years. The Carillon Eagle Mid Cap Growth Fund Class A shares have a 4 star rating for the five-year period out of 500 funds. Carillon Eagle Mid Cap Growth Fund I shares was rated against the following number of funds in the Mid-Cap Growth category over the following time periods: 558 funds for the overall time period, 500 in the last five years and 381 funds in the last ten years. The Carillon Eagle Mid Cap Growth Fund Class I shares have a 3 star rating for the three-year period out of 558 funds. The calculation is based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance. Absent fee waivers the rankings may have been lower. Past performance is no guarantee of future results.

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance at offer reflects a front-end sales charge of 4.75 percent for Class A shares; a contingent deferred sales charge of 1 percent for Class C shares; and redemptions made earlier than one year after purchase. Performance data quoted reflects reinvested dividends and capital gains. Returns of less than one year are not annualized. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month-end may be obtained by calling 1.800.421.4184 or visiting carillontower.com.

Performance “at NAV” assumes that no front-end sales charge applied or the investment was not redeemed. Performance “at offer” assumes that a front-end sales charge applied to the applicable extend.

Class I and R shares have no sales charge and are only available to certain investors. See the prospectus for more information.

*The Carillon Family of Funds will convert class C share accounts that are more than 10 years old to class A shares on the third of each month. Shareholders may continue to purchase shares in either class, but will be required to pay a sales charge on new purchases of Class A shares.

Risk Considerations

Past performance does not guarantee future results. Investments in mid-cap and small-cap companies generally involve greater risks than investing in larger capitalization companies. Mid-cap companies often have narrower commercial markets, more limited managerial and financial resources, and more volatile trading than larger, more established companies.

Growth companies are expected to increase their earnings at a certain rate. When these expectations are not met, investors may punish the stocks excessively, even if earnings showed an absolute increase. Growth company stocks also typically lack the dividend yield that can cushion stock prices in market downturns. The companies engaged in the technology industry are subject to fierce competition and their products and services may be subject to rapid obsolescence. The values of these companies tend to fluctuate sharply.

Mid-cap and small-cap stocks may temporarily fall out of favor or perform poorly relative to other types of investments. While stocks of mid-cap companies may be slightly less volatile than those of small-cap companies, they still involve substantial risk. The Fund may, at times, experience higher-than-average portfolio turnover, which may generate significant taxable gains and increased trading expenses, which, in turn, may lower the Funds return.

Please consider the investment objectives, risks, charges, and expenses of any fund carefully before investing. Call 1.800.421.4184 or your financial professional for a prospectus, which contains this and other important information about the funds. Read the prospectus carefully before you invest or send money.

Large-caps are represented by the Russell Top 200® Index. The Russell Top 200® Index measures the performance of the 200 largest companies in the Russell 3000® Index.

The Russell Midcap® Index measures the performance of the mid-cap segment of the Russell 3000® Index. The stocks are also members of the Russell 1000 Index.

Small-caps are represented by the Russell 2000® Index. The Russell 2000® Index measures the performance of the 2,000 smallest companies in the Russell 3000® Index.

The Russell Midcap® Growth Index measures the performance of those Russell Midcap companies with higher price-to-book ratios and higher forecasted growth values. The stocks are also members of the Russell 1000® Growth Index.

Small/Mid (SMID) cap are represented by the Russell 2500® Index. The Russell 2500 Index measures the performance of the 2,500 smallest companies in the Russell 3000® Index.

Investors cannot invest directly in an index and unmanaged index returns do not reflect any fees, expenses or sales charges.

Morningstar star ratings information: the information contained herein (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Funds with at least three years of performance history are assigned ratings from the fund's three, five- and 10-year average annual returns (when available) and a risk factor that reflects fund performance relative to three-month Treasury bill monthly returns. Fund returns are adjusted for fees and sales loads. Ten percent of the funds in an investment category receive five stars, 22.5% receive four stars, 35% receive three stars, 22.5% receive two stars and the bottom 10% receive one star. Investment return and principal value will vary so that investors have a gain or loss when shares are sold. Funds are rated for up to three time periods (three-, five- and 10-years) and these ratings are combined to produce an overall rating. Ratings may vary among share classes and are based on past performance.
