

At Carillon Tower Advisers, we believe investor interests are best served by allocating capital to organizations that generate long-term value for all constituents. Our affiliates have a longstanding commitment to investing that recognizes the core values of our clients. We believe that considering environmental, social, and governance (“ESG”) issues is an important part of what we do as asset managers. We are actively seeking to help clients find attractive performance and minimize risk through sustainable investment practices.

While each of the Carillon-affiliated asset management firms is unique in its investment approach, they all share a commitment to investing for the long term. Incorporating environmental, social, and governance considerations in investment decisions, consistent with each firm’s philosophy and process, is at the heart of the Carillon approach to responsible investing.

Active Ownership

At Carillon, we believe a vital aspect of responsible investing is active ownership. This includes proxy voting and corporate engagement.

Proxy Voting

As shareholders in a company, equity investors have a voice in its operations, primarily through proxy voting. We believe by voting proxies in the best interests of our clients, we are fulfilling our fiduciary duty and promoting long-term value creation. In general, Carillon’s affiliates support shareholder resolutions that improve transparency, support diversity, protect the environment, uphold human rights, and promote sound governance and responsible business practices.

Corporate Engagement

Each affiliate has its own approach to corporate engagement, which can take many forms, including calls, letters, and/or emails with company management.

Investment teams can engage with portfolio companies on issues of concern, either directly or as part of a pooled engagement effort with a third-party service provider. Regardless of the method used, engagement is an important means to help effect positive change.

Disclosures

ESG refers to Environmental, Social, and Governance factors used in measuring the sustainability and societal impact of an investment in a company or business. An ESG investment strategy will include only holdings deemed consistent with the applicable ESG guidelines. As a result, the universe of investments available to the strategy will be more limited than strategies not applying such guidelines, which may cause it to perform differently than similar portfolios that do not have such a policy.
