

Carillon Eagle Mid Cap Growth Fund

SUMMARY PROSPECTUS | 3.1. 2021

Class A HAGAX	Class C HAGCX	Class I HAGIX	Class Y HRAYX	Class R-3 HAREX	Class R-5 HARSX	Class R-6 HRAUX
---------------	---------------	---------------	---------------	-----------------	-----------------	-----------------

Before you invest, you may want to review the fund's Prospectus, which contains more information about the fund and its risks. You can find the fund's Prospectus, Statement of Additional Information ("SAI"), shareholder reports and other information about the fund online at <http://www.carillontower.com/prospectus.htm>. You can also get this information at no cost by calling 800.421.4184 or by sending an email to CarillonFundServices@carillontower.com. The fund's Prospectus and SAI, both dated March 1, 2021 as each may be supplemented from time to time, are incorporated by reference into this Summary Prospectus.

As of January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the funds' shareholder reports are no longer sent by mail, unless you specifically request paper copies of the reports from a fund or from your financial intermediary, such as a broker-dealer or bank. Instead, the reports are made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from a fund or your financial intermediary electronically by going to carillontower.com/eDelivery.

You may elect to receive all future reports in paper free of charge. You can inform a fund that you wish to continue receiving paper copies of your shareholder reports by calling 800.421.4184, or you may directly inform your financial intermediary of your wish. A notice that will be mailed to you each time a report is posted will also include instructions for informing a fund that you wish to continue receiving paper copies of your shareholder reports. Your election to receive reports in paper from a fund will apply to all funds held with the Carillon Mutual Funds or your financial intermediary, as applicable.

Investment objective | The Carillon Eagle Mid Cap Growth Fund ("Mid Cap Growth Fund" or the "fund") seeks long-term capital appreciation.

Fees and expenses of the fund | The tables that follow describe the fees and expenses that you may pay if you buy, hold, and sell shares of the Mid Cap Growth Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** You may qualify for sales discounts if you and your family invest, or agree to invest in the future, at least \$25,000 in the Class A shares of the Carillon Family of Funds. More information about these and other discounts, including through specific financial intermediaries, is available from your financial professional, on page 97 of the fund's Prospectus and on page 52 of the fund's Statement of Additional Information. Although the fund does not impose any sales charge on Class I shares, you may pay a commission to your broker on your purchases and sales of those shares, which is not reflected in the tables or Example below.

Shareholder fees (fees paid directly from your investment):

	Class A	Class C	Class I	Class Y	Class R-3	Class R-5	Class R-6
Maximum Sales Charge Imposed on Purchases (as a % of offering price)	4.75%	None	None	None	None	None	None
Maximum Deferred Sales Charge (as a % of original purchase price or redemption proceeds, whichever is lower)	None (a)	1.00% (a)	None	None	None	None	None
Redemption Fee	None	None	None	None	None	None	None

Annual fund operating expenses (expenses that you pay each year as a percentage of the value of your investment):

	Class A	Class C	Class I	Class Y	Class R-3	Class R-5	Class R-6
Management Fees	0.51%	0.51%	0.51%	0.51%	0.51%	0.51%	0.51%
Distribution and Service (12b-1) Fees	0.25%	1.00%	0.00%	0.25%	0.50%	0.00%	0.00%
Other Expenses	0.28%	0.23%	0.21%	0.29%	0.30%	0.22%	0.13%
Total Annual Fund Operating Expenses	1.04%	1.74%	0.72%	1.05%	1.31%	0.73%	0.64%

(a) If you purchased \$1,000,000 or more of Class A shares of a Carillon mutual fund that were not otherwise eligible for a sales charge waiver and sell the shares within 18 months from the date of purchase, you may pay up to a 1% contingent deferred sales charge at the time of sale. If you sell Class C shares less than one year after purchase, you will pay a 1% CDSC at the time of sale.

Carillon Eagle Mid Cap Growth Fund

SUMMARY PROSPECTUS | 3.1. 2021

Expense example | This example is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

Share Class	Year 1	Year 3	Year 5	Year 10
Class A	\$576	\$790	\$1,022	\$1,686
Class C	\$277	\$548	\$944	\$2,052
Class I	\$74	\$230	\$401	\$894
Class Y	\$107	\$334	\$579	\$1,283
Class R-3	\$133	\$415	\$718	\$1,579
Class R-5	\$75	\$233	\$406	\$906
Class R-6	\$65	\$205	\$357	\$798

Portfolio turnover | The fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the fund's performance. During the most recent fiscal year, the fund's portfolio turnover rate was 27% of the average value of its portfolio.

Principal investment strategies | During normal market conditions, the Mid Cap Growth Fund seeks to achieve its objective by investing at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in the equity securities of mid-capitalization companies. The fund's portfolio managers consider mid-capitalization companies to be those companies that, at the time of initial purchase, have capitalizations greater than \$1 billion and equal to or less than the largest company in the Russell Midcap[®] Growth Index during the most recent 12-month period (approximately \$80.6 billion during the 12-month period ended December 31, 2020).

The fund will invest primarily in the equity securities of companies that the portfolio managers believe have the potential for above-average earnings or sales growth, reasonable valuations and acceptable debt levels. Such stocks can typically have high price-to-earnings ratios. Equity securities include common and preferred stock, warrants or rights exercisable into common or preferred stock and high-quality convertible securities. Although the portfolio managers generally do not emphasize investment in any particular investment sector or industry, the fund may invest a significant portion of its assets in the securities of companies in the information technology and health care sectors at any given time. The fund will generally sell when the stock has met the portfolio managers' target price, the investment is no longer valid, a better investment opportunity has arisen or if the investment reaches a value more than 5% of the fund's net assets. At times, the fund may hold securities of small-capitalization companies.

The fund may lend its securities to broker-dealers and other financial institutions to earn additional income.

Principal risks | The greatest risk of investing in the fund is that you could lose money. The fund invests primarily in common stocks whose values may increase and decrease in response to the activities of the companies that issued such stocks, general market conditions and/or economic conditions. As a result, the fund's net asset value ("NAV") may also increase and decrease. An investment in the fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Investments in the fund are subject to the following primary risks. The most significant risks of investing in the fund as of the date of this Prospectus are listed first below, followed by the remaining risks in alphabetical order. Each risk summarized below is considered a "principal risk" of investing in the fund, regardless of the order in which it appears. Different risks may be more significant at different times depending on market conditions or other factors.

- Mid-cap company risk arises because mid-cap companies may have narrower commercial markets, limited managerial and financial resources, more volatile performance, and less liquid stock, compared to larger, more established companies;
- Growth stock risk is the risk of a growth company not providing an expected earnings increase or dividend yield. When these expectations are not met, the prices of these stocks may decline, even if earnings showed an absolute increase. If a growth investment style shifts out of favor based on market conditions and investor sentiment, the fund could underperform funds that use a value or other non-growth approach to investing or have a broader investment style;
- Small-cap company risk arises because small-cap companies may have less liquid stock, a more volatile share price, a limited product or service base, narrower commercial markets and limited access to capital, compared to larger, more established companies;
- Equity securities are subject to market risk. The fund may invest in the following equity securities, which may expose the fund to the following additional risks:

Common stocks. The value of a company's common stock may fall as a result of factors affecting the company, companies in the same industry or sector, or the financial markets overall. Common stock generally is subordinate to preferred stock upon the liquidation or bankruptcy of the issuing company;

Carillon Eagle Mid Cap Growth Fund

SUMMARY PROSPECTUS | 3.1. 2021

Preferred stock. Preferred stocks are subject to issuer-specific risks and are sensitive to movements in interest rates. Preferred stocks may be less liquid than common stocks and, unlike common stocks, participation in the growth of an issuer may be limited. Distributions on preferred stocks generally are payable at the discretion of an issuer and after required payments to bond holders. Preferred stocks may also be subject to credit risk;

Convertible securities. Convertible securities are subject to the risk that the credit standing of the issuer may have an effect on the convertible securities' investment value. Convertible securities also are sensitive to movements in interest rates. Generally, a convertible security is subject to the market risks of stocks when the price of the underlying stock is high relative to the conversion price, and is subject to the market risks of debt securities when the underlying stock's price is low relative to the conversion price;

Rights and warrants. Rights and warrants do not carry dividend or voting rights with respect to the underlying securities or any rights in the assets of the issuer, and a right or a warrant ceases to have value if it is not exercised prior to its expiration date;

- **Market risk** is the risk that markets may at times be volatile, and the values of the fund's holdings may decline, sometimes significantly and/or rapidly, because of adverse issuer-specific conditions or general market conditions, including a broad stock market decline, which are not specifically related to a particular issuer. These conditions may include real or perceived adverse political, regulatory, market, economic or other developments, such as natural disasters, public health crises, pandemics, changes in federal, state or foreign government policies, regional or global economic instability (including terrorism and geopolitical risks) and interest and currency rate fluctuations. These and other conditions may cause broad changes in market value, the general outlook for corporate earnings, public perceptions concerning these developments or adverse investment sentiment generally. Changes in the financial condition of a single issuer, industry or market segment also can impact the market as a whole. In addition, adverse market events may lead to increased redemptions, which could cause the fund to experience a loss when selling securities to meet redemption requests by shareholders. Adverse market conditions may be prolonged and may not have the same impact on all types of securities. Conversely, it is also possible that, during a general downturn in the securities markets, multiple asset classes may decline in value simultaneously. Changes in value may be temporary or may last for extended periods. The financial markets generally move in cycles, with periods of rising prices followed by periods of declining prices. The value of your investment may reflect these fluctuations.

Recent market events risk includes risks arising from current and recent circumstances impacting markets. The impact of the COVID-19 pandemic has been rapidly evolving, and it has resulted, and may continue to result, in significant disruptions to business operations, travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruptions of and delays in healthcare service preparation and delivery, prolonged quarantines and stay-at-home orders, cancellations, supply chain disruptions, widespread business closures and layoffs, service and event cancellations, reductions and other changes, and lower consumer demand, as well as general concern and uncertainty that has negatively affected the global economy. The Board of Governors of the Federal Reserve System (also known as "the Fed") has taken and may continue to take numerous measures to address the economic impact of the COVID-19 pandemic, such as the reduction of the federal funds target rate and the introduction of several credit and liquidity facilities, and the U.S. federal government has taken and may continue to take steps to stimulate the U.S. economy, including adopting stimulus packages targeted at large parts of the economy. The effect of these and other efforts may not be known for some time, and it is not known whether and to what extent they will be successful.

Decisions by the Fed regarding interest rate and monetary policy continue to have a significant impact on securities prices as well as the overall strength of the U.S. economy. Future legislative, regulatory and policy changes may impact current international trade deals, result in changes to prudential regulation of certain players in the financial market, and provide significant new investments in infrastructure, the environment, or other areas. A rise in protectionist trade policies, slowing global economic growth, risks associated with ongoing trade negotiations with China, risks associated with the United Kingdom's departure from the European Union on December 31, 2020, and a trade agreement between the United Kingdom and the European Union, and the possibility of changes to some international trade agreements, could affect the economies of many nations, including the United States, in ways that cannot necessarily be foreseen at the present time. Interest rates have been unusually low in recent years in the U.S. and abroad and are currently at historic lows. Economists and others have expressed increasing concern about the potential effects of global climate change on property and security values. Regulatory changes and divestment movements tied to concerns about climate change could adversely affect the value of certain land and the viability of industries whose activities or products are seen as accelerating climate change;

- **Sector risk** is the risk associated with the fund holding a core portfolio of stocks invested in similar businesses, all of which could be affected by similar economic or market conditions. As the fund's portfolio changes over time, the fund's exposure to a particular sector may become higher or lower.

The health care sector may be affected by government regulations and government health care programs, restrictions on government reimbursement for medical expenses, increases or decreases in the cost of medical products and services and product liability claims, among other factors. Many health care products and services may be subject to regulatory approvals. The process of obtaining such approvals may be long and costly, and delays in or failure to receive such approvals may negatively impact the business of such companies. Additional or more stringent laws and regulations enacted in the future could have a material adverse effect on such companies in the health care sector;

Information technology sector risk is the risk that products of information technology companies may face rapid product obsolescence due to technological developments and frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel. Failure to introduce new products, develop and maintain a loyal customer base or achieve general market acceptance for their products could have a material adverse effect on a company's business. Companies in the information technology sector are heavily dependent on intellectual property and the loss of patent, copyright and trademark protections may adversely affect the profitability of these companies; and

Carillon Eagle Mid Cap Growth Fund

SUMMARY PROSPECTUS | 3.1. 2021

- Securities lending risk is the risk that, if the fund lends its portfolio securities and receives collateral in the form of cash that is reinvested in securities, those securities may not perform sufficiently to cover the return collateral payments owed to borrowers. In addition, delays may occur in the recovery of securities from borrowers, which could interfere with the fund's ability to vote proxies or to settle transactions and there may be a loss of rights in the collateral should the borrower fail financially.

Performance | The bar chart that follows illustrates annual fund returns for the periods ended December 31. The table that follows compares the fund's returns for various periods with benchmark returns. This information is intended to give you some indication of the risk of investing in the fund by demonstrating how its returns have varied over time. The bar chart shows the fund's Class I share performance from one year to another. Each of the fund's share classes is invested in the same portfolio of securities, and the annual returns would have differed only to the extent that the classes do not have the same sales charges and expenses. The fund's past performance (before and after taxes) is not necessarily an indication of how the fund will perform in the future. To obtain more current performance data as of the most recent month-end, please visit our website at carillontower.com.

During 10 year period (Class I shares):

	Return	Quarter Ended
Best Quarter	32.86%	June 30, 2020
Worst Quarter	(21.73)%	September 30, 2011

Average annual total returns (for the periods ended December 31, 2020):

Fund return (after deduction of sales charges and expenses)

Share Class	Inception Date	1-yr	5-yr	10-yr	Lifetime (if less than 10 yrs)
Class I – Before Taxes	6/21/06	40.24%	19.91%	15.16%	
After Taxes on Distributions		39.55%	19.25%	14.37%	
After Taxes on Distributions and Sale of Fund Shares		24.32%	16.11%	12.54%	
Class A – Before Taxes	8/20/98	33.13%	18.37%	14.22%	
Class C – Before Taxes	8/20/98	38.82%	18.69%	13.98%	
Class Y – Before Taxes	11/20/17	39.75%			20.05%
Class R-3 – Before Taxes	1/12/09	39.42%	19.19%	14.47%	
Class R-5 – Before Taxes	12/28/09	40.21%	19.90%	15.14%	
Class R-6 – Before Taxes	8/15/11	40.34%	20.02%		17.25%

Carillon Eagle Mid Cap Growth Fund

SUMMARY PROSPECTUS | 3.1. 2021

Index (reflects no deduction for fees, expenses or taxes)

	1-yr	5-yr	10-yr	Lifetime (From Inception Date of Class Y Shares)	Lifetime (From Inception Date of Class R-6 Shares)
Russell Midcap [®] Growth Index	35.59%	18.66%	15.04%	20.62%	16.50%

After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements, such as a 401(k) plan or individual retirement account ("IRA"). After-tax returns are shown for Class I only and after-tax returns for Class A, Class C, Class Y, Class R-3, Class R-5, and Class R-6 will vary. The return after taxes on distributions and sale of fund shares may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of fund shares at the end of the measurement period.

Investment Adviser | Carillon Tower Advisers, Inc. is the fund's investment adviser.

Sub-adviser | Eagle Asset Management, Inc. serves as the sub-adviser to the fund.

Portfolio Managers | Bert L. Boksen, CFA[®], Eric Mintz, CFA[®], and Christopher Sassouni, D.M.D. are Portfolio Managers of the fund and are jointly and primarily responsible for all aspects of the fund's management. Mr. Boksen has managed the fund since its inception, Mr. Mintz has managed the fund since 2011, and Christopher Sassouni, D.M.D., served as an Assistant Portfolio Manager of the fund from 2006 to September 2020, and has managed the fund as a Portfolio Manager since September 2020.

Purchase and sale of fund shares | You may purchase, redeem, or exchange Class A, C, I and Y shares of the fund on any business day through your financial intermediary, by mail at Carillon Family of Funds, c/o U.S. Bank Global Fund Services, P.O. Box 701, Milwaukee, WI 53201-0701 (for regular mail) or 615 East Michigan Street, Third Floor, Milwaukee, WI, 53202 (for overnight service), or by telephone (800.421.4184). In Class A and Class C shares, the minimum purchase amount is \$1,000 for regular accounts, \$500 for retirement accounts and \$50 through a periodic investment program, with a minimum subsequent investment plan of \$50 per month. In Class Y shares, the minimum purchase amount is \$1,000 for regular accounts, \$100 for retirement accounts and \$100 through a periodic investment program, with a minimum subsequent investment plan of \$50 per month. The minimum initial purchase for Class I shares is \$10,000, while fee-based plan sponsors set their own minimum requirements. Class R-3, Class R-5 and Class R-6 shares can only be purchased through a participating retirement plan and the minimum initial purchase for Class R-3, Class R-5 and Class R-6 shares is set by the plan administrator.

Tax information | The dividends you receive from the fund will be taxed as ordinary income or net capital gain (i.e., the excess of net long-term capital gain over net short-term capital loss) unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an IRA, in which case you may be subject to federal income tax on withdrawals from the arrangement.

Payments to broker-dealers and other financial intermediaries | If you purchase shares of the fund through a broker-dealer or other financial intermediary (such as a bank), the fund and its related companies may pay the intermediary for the sale of fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
