Expense waivers had a material effect on the returns and ratings which would have been lower absent waivers.

Investment Overview

- The Fund's investment process combines top-down interest rate management with bottom-up fixed income security selection, focusing on undervalued issues in the fixed income market.
- Duration strategy is based on a model in which current inflation-adjusted interest rates are evaluated relative to historical norms.
- Bottom-up security selection is based on a scenario analysis to identify which bonds might perform best under possible interest-rate and credit scenarios.
- The team invests primarily in investment-grade securities, but may also invest up to 25 percent of its assets in non-investment grade securities, also known as high-yield securities or "junk" bonds.

Key Portfolio Characteristics¹

	Fund	Index
Number of holdings	145	12,350
Average duration (years)	5.80	6.78
Average maturity (years)	6.86	8.71

¹The above key portfolio characteristics are demonstrative of the investment team's management style.

Average duration is a time measure of a bond's interest-rate sensitivity. The shorter (longer) the duration, the lower (higher) the interest rate risk and price volatility.

Average maturity is computed by weighting the maturity of each security in the portfolio by the market value of the security, then averaging these weighted figures.

Performance data quoted represents past performance which does not guarantee future results. The investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Net performance reflects a front-end sales charge or 3.75% for class A shares. A 1% contingent deferred sales charge for class C shares is charged on redemptions made within 12 months of purchase, but not at one year. The Fund's investment adviser, Carillon Tower Advisers, Inc., has contractually agreed to waive or reimburse certain fees and expenses through Feb. 28, 2022, and may recover/recoup previously waived expenses that it assumes within the following two fiscal years. Performance data quoted reflects reinvested dividends and capital gains. Returns less than one year are not annualized. Current performance may be higher or lower than the performance data quoted. Performance data current to the most recent month-end may be obtained by calling 1.800.421.4184 or visiting carillontower.com.

Performance "at NAV" assumes that no front-end sales charge applied or the investment was not redeemed. Performance "at offer" assumes that a front-end sales charge applied to the extent applicable.

Class I and R shares have no sales charge and are only available to certain investors. See the prospectus for more information.

Please consider the investment objectives, risks, charges, and expenses of any fund carefully before investing. Read the prospectus carefully before you invest or send money.

Risk Considerations: The return of principal in a fixed income fund is not guaranteed. Fixed income funds have the same interest rate, inflation, issuer, maturity and credit risks that are associated with underlying fixed income securities owned by the fund. Mortgage- and Asset-Backed Securities are subject to prepayment risk and the risk of default on the underlying mortgages or other assets.

High-yield securities involve greater risk than investment grade securities and tend to be more sensitive to economic conditions and credit risk.

Foreign investments present additional risks due to currency fluctuations, economic and political factors, government regulations, differences in accounting standards and other factors. Investments in emerging markets involve even greater risks.

Derivatives such as options, futures contracts, currency forwards or swap agreements may involve greater risks than if the Fund invested in the referenced obligation directly. Derivatives are subject to risks such as market risk, liquidity risk, interest rate risk, credit risk, and management risk. Derivative investments could lose more than the principal amount invested. The Fund may use derivatives for hedging purposes or as part of its investment strategy. The use of leverage and derivatives investments could accelerate losses to the fund. These losses could exceed the amount originally invested.

The Fund may, at times, experience higher-than-average portfolio turnover, which may generate significant taxable gains and increased trading expenses, which, in turn, may lower the Fund's return.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Funds with at least three years of performance history are assigned ratings from the fund's three-, five- and 10-year average annual returns (when available) and a risk factor that reflects fund performance relative to three-month Treasury bill monthly returns. Funds' returns are adjusted for fees and sales loads. Ten percent of the funds in an investment category receive five stars, 22.5% receive four stars, 35% receive three stars, 22.5% receive two stars and the bottom 10% receive one star. Investment return and principal value will vary so that investors have a gain or loss when shares are sold. Funds are rated for up to three time periods (three-, five-, and 10-years) and these ratings are combined to produce an overall rating. Ratings may vary among share classes and are based on past performance.
