2 stars for the 3-year period among 278 funds

2 stars for the 5-year period among 187 funds

Expense waivers had a material effect on the returns and ratings which would have been lower absent waivers.

## Investment Overview

- The Fund seeks to maximize total return by systematically pursuing relative-value opportunities in all sectors of the fixed income market.
- The firm's disciplined investment philosophy and process are used to identify and evaluate relative value opportunities, and the "best ideas" are selected for use.
- Derivative instruments, such as futures, options and credit default swaps, may be used to gain exposure and manage risk.

## Key Portfolio Characteristics<sup>1</sup>

Number of holdings	71
Average duration (years)	3.19
Average maturity (years)	5.03

<sup>†</sup>The above key portfolio characteristics are demonstrative of the investment team's management style.

Average duration is a time measure of a bond's interest-rate sensitivity. The shorter (longer) the duration, the lower (higher) the interest rate risk and price volatility.

Average maturity is computed by weighting the maturity of each security in the portfolio by the market value of the security, then averaging these weighted figures.

Performance data quoted represents past performance which does not guarantee future results. The investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Net performance reflects a front-end sales charge or 3.75% for class A shares. A 1% contingent deferred sales charge for class C shares is charged on redemptions made within 12 months of purchase, but not at one year. The Fund's investment adviser, Carillon Tower Advisers, Inc., has contractually agreed to waive or reimburse certain fees and expenses through Feb. 29, 2020, and may recover/recoup previously waived expenses that it assumes within the following two fiscal years. Performance data quoted reflects reinvested dividends and capital gains. Returns less than one year are not annualized. Current performance may be higher or lower than the performance data quoted. Performance data current to the most recent month-end may be obtained by calling 800.421.4184 or visiting carillontower.com.

Performance "at NAV" assumes that no front-end sales charge applied or the investment was not redeemed. Performance "at offer" assumes that a front-end sales charge applied to the extent applicable.

Class I and R shares have no sales charge and are only available to certain investors. See the prospectus for more information.

The BofA Merrill Lynch USD 3-Month LIBOR Constant Maturity Index is based on the assumed purchase of a synthetic instrument having 3 months to maturity and with a coupon equal to the closing quote for 3-Month LIBOR. That issue is sold the following day (priced at a yield equal to the current day closing 3-Month LIBOR rate) and is rolled into a new 3-Month instrument. The index, therefore, will always have a constant maturity equal to exactly 3 months. It is not possible to invest in an index.

**Please consider the investment objectives, risks, charges, and expenses of any fund carefully before investing. Call 800.421.4184 or your financial advisor for a prospectus, which contains this and other important information about the funds. Read the prospectus carefully before you invest or send money.**

**Risk Considerations:** The Fund employs an unconstrained investment approach which creates considerable exposure to certain types of securities that present significant volatility in the Fund's performance, particularly over short periods of time. The return of principal in a fixed income fund is not guaranteed. Fixed income funds have the same interest rate, inflation, issuer, maturity and credit risks that are associated with underlying fixed income securities owned by the Fund.

Foreign investments present additional risks due to currency fluctuations, economic and political factors, government regulations, differences in accounting standards and other factors. Investments in emerging markets involve even greater risks.

Mortgage- and Asset-Backed Securities are subject to prepayment risk and the risk of default on the underlying mortgages or other assets. High-yield securities involve greater risk than investment grade securities and tend to be more sensitive to economic conditions and credit risk.

Derivatives such as options, futures contracts, currency forwards or swap agreements may involve greater risks than if the Fund invested in the referenced obligation directly. Derivatives are subject to risks such as market risk, liquidity risk, interest rate risk, credit risk and management risk. Derivative investments could lose more than the principal amount invested. The Fund may use derivatives for hedging purposes or as part of its investment strategy. The use of leverage, derivatives, and short sales could accelerate losses to the fund. These losses could exceed the amount originally invested.

The Fund may, at times, experience higher-than-average portfolio turnover, which may generate significant taxable gains and increased trading expenses, which, in turn, may lower the Fund's return.

Short-sale risk includes the potential loss of more money than the actual cost of the investment, and the risk that the third party to the short sale may fail to honor its contract terms, causing a loss to the fund.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Funds with at least three years of performance history are assigned ratings from the fund's three-, five- and 10-year average annual returns (when available) and a risk factor that reflects fund performance relative to three-month Treasury bill monthly returns. Funds' returns are adjusted for fees and sales loads. Ten percent of the funds in an investment category receive five stars, 22.5% receive four stars, 35% receive three stars, 22.5% receive two stars and the bottom 10% receive one star. Investment return and principal value will vary so that investors have a gain or loss when shares are sold. Funds are rated for up to three time periods (three-, five-, and 10-years) and these ratings are combined to produce an overall rating. Ratings may vary among share classes and are based on past performance.
